

MEDICATIONS TO AVOID

7 TO 10 DAYS BEFORE YOUR SURGERY

(UNLESS OTHERWISE INSTRUCTED)

This is a list of frequently used blood thinning medications. However, your medication may not be included here. Please call our office if you are unsure whether to stop the medicine before surgery.

*Your Primary Care Physician (PCP) and or Cardiologist must fax over a written statement that is it okay to stop major blood thinning medications prior to surgery. Please have them fax this permission statement to our office at 540-301-2579.
